

▶ SUMMARY

With over 10 years of web development experience and six years of expertise in Reactjs, Redux, and Nodejs, I am a Software Developer III at Rackspace Technology, a leading provider of cloud computing solutions. My mission is to deliver applications with the best user experience and accessibility for the end users.

In my current role, I work on UI and feature improvements, create POC and architect solutions, maintain and monitor CI and CD pipelines, review feature pull requests, and address production application bugs. I have also earned the Six Sigma Yellow Belt certification, which demonstrates my commitment to quality and continuous improvement. Previously, I have worked with clients from different domains and geographies, such as a Hong Kong-based startup, a remote team based in Germany, US, and India, and Honeywell, where I received multiple awards for my web development projects

▶ PROJECTS

RACKSPACE CONTROL PANEL FOR MICROSOFT SOFTWARE AND LICENSES Dec. 2019 to Current

A dashboard where customers can view and add their active Microsoft software licenses, modify their quantity and assign licenses to different users. I am responsible for creating new UI components with new features, fix production bugs and work on feature POC. Created in .Net Core + Reactjs + Nodejs and hosted in Azure App Services. Worked with a team of 5 people based in India and the US.

LALAMOVE Dec. 2018 to Dec. 2019

Lalamove is a Hong Kong based logistics company. The Lalamove dashboard is a internal tool used by the Lalmove support team to track and assign orders to riders. We were responsible for migrating the dashboard from JQuery to Reactjs, implementing new UI features and fixing productions bugs. Created in PHP Laravel. Worked with a team of 5 people based in India and Hong Kong.

RELTIO Jan. 2018 to Sept. 2019

Created a dashboard for Reltio - Cloud MDM - Master Data Management. The dashboard provided the ability to sort, categories data uploaded via a csv or excel file. Created in Nodejs and Reactjs, a server side rendered application. Worked with a team of 6 people based in India and Germany.
